**2013 REPORT TO THE LEGISLATURE REGARDING THE USE AND IMPACT OF
CREDIT IN PERSONAL LINES INSURANCE PREMIUMS PURSUANT TO ARK.
CODE ANN. § 23-67-415 (Act 1452 of 2003)**

INTRODUCTION

Ark. Code Ann. § 23-67-415 (Act 1452 of 2003) requires all property and casualty insurance companies that write certain personal lines insurance products and use consumer credit information to annually report its effect on premiums not later than March 31 of each year.

In 2004, the Commissioner issued a Bulletin requiring all companies writing personal lines and using credit to file a report providing the required information¹.

THE ACT

Act 1452 of 2003 (the Act) is commonly referred to as the NCOIL² Model which was developed to address the use of credit and insurance scoring in personal lines insurance. The Act covers both the use of credit in determining a consumer's premium and the use of credit in underwriting. The Act prohibits several types of events from being considered when evaluating a consumer's credit;³ affords many rights to the consumer⁴ consistent with the Federal Fair Credit Reporting Act (FCRA);⁵ requires a specific notice to the consumers who are applying for insurance⁶ and imposes, consistent with existing law, certain actuarial justifications that must be met before a company may use credit⁷.

The effect of credit information derived from a consumer report is outlined in this report. Credit derived from a consumer report may be used in underwriting and rating personal lines of insurance⁸. To the extent credit information is used, it cannot be the sole factor in determining whether someone can obtain insurance or the amount to be paid for the coverage⁹. The FCRA determines what constitutes a consumer report and provides safeguards for correcting errors in a database containing a consumer's credit, personal, or lifestyle information. Arkansas adds an additional notice when a consumer applies for insurance or seeks a quote. This notice informs the consumer that credit will be used in conjunction with other factors to determine whether coverage will be offered and at what price.

SUMMARY

Act 1452 required each insurance company using credit as a component in determining an insured's premium to report to the Commissioner. A compilation of these reports indicate three-fourths of the insurers writing personal lines insurance utilize consumer credit. The data also indicates that 87% of consumers whose premium involved a credit component either received a lower premium or their premium was unaffected. Overall 45% of consumers received some decrease in their premium as opposed to only 13% who received some increase in their premium.

The companies using credit wrote 95.8% of the personal lines premium volume in Arkansas during 2012.
